dm@danielmv.com

Full-stack web developer with a balanced skill set across front-end and back-end, focused on clean code, intuitive UI, and scalable, reliable systems. Thrives in collaborative, quality-driven environments.

EXPERIENCE

Quipil — Atlanta, United States

Front-end Developer

JANUARY 2025 - PRESENT

Developed and enhanced features for an e-commerce platform and its admin console, focusing on migrations, refactors, UI improvements, and maintaining unit test coverage with Vitest.

Software Engineer

AUGUST 2021 - DECEMBER 2024

Maintained and expanded a legacy e-commerce system, built a gateway between services, managed multi-site deployments, integrated third-party APIs, and configured automated cron jobs.

Improving — Aguascalientes, México

Software Specialist

AUGUST 2021 - DECEMBER 2024

Outsourcing company, assigned to Quipli project.

Lion Intel — Aguascalientes México

Software Engineer

JANUARY 2021 - JULY 2021

Built a REST API to integrate with online stores, e-commerce platforms, and third-party services.

Internship (part-time during degree)

APRIL 2016 - DECEMBER 2020

Worked on custom e-commerce solutions with automated deployments, advanced UI features, and internal integrations. Contributed to a multi-marketplace product management platform.
